

## Gas Logic Winter Offer – The right combination for business

As the economy slows down and customers tighten their belts, it makes sound commercial sense for installers to be able to offer as many different services as possible to the customer. In support of this and as part of our goal to bring value for money to our customers Gas Logic is pleased to announce our latest money saving offer. If you book one of our gas or electrical packages as listed below you will receive 30% off our other courses. To take advantage of this offer both courses must be booked at the same time. This offer is only available to bookings made during the months of November, December and January.

### Book one of these packages

- Domestic Core Gas Re-assessment Package*
- Domestic Core Gas Initial Package*
- Commercial Core Gas Package*
- Domestic to Commercial Changeover Package*
- Domestic to Commercial Up-skill Package*
- Domestic to Catering Changeover Package*
- Catering Core Gas Package*
- 'Part P' Defined Scope Electrical Package*
- 'Part P' Full Scope Electrical Package*
- City & Guilds 2391 Testing & Inspection*

### Receive 30% off one of these courses

- Solar Thermal Domestic Hot Water*
- Foundation Certification in Heating and Hot Water System Design and Specification*
- 'Part P' Defined Scope Electrical Package*
- 'Part P' Full Scope Electrical Package*
- 17th Edition Wiring Regulations Full Course (2382-10)*
- Domestic Periodic Testing & Inspection of Electrical Installations*
- Unvented Hot Water Systems (initial only)*
- WRAS Water Regulations 1999*

This fantastic offer is only available for bookings made during the months of November, December and January; you do not need to take the courses during these months, only to have booked them. We will of course be exhibiting at the Chelsea PHEX exhibition in November and we would be pleased to welcome you on to the stand to discuss your requirements.

### STOP PRESS

Gas Logic at Basildon opens commercial catering facilities.

## Ongoing changes to our centres

As part of Gas Logic's on going improvement plan we have been updating and adding to our already extensive Northolt and Basildon facilities to make Gas Logic your one-stop shop for training and assessment.

BASILDON Centre

NORTHOLT Centre

## New Catering Assessment Facilities at Basildon Centre

Gas Logic at Basildon has now received approval to offer the following Commercial Catering assessments, this is in addition to our approval for domestic, LPG and commercial gas assessments. To book a place for yourself or another operative please call the office on 0845 845 7222.

CODC1 – *Changeover from Domestic Core to Commercial Catering (candidates must hold a valid CCN1)*

COCATA1 – *Changeover from Domestic Appliances to Commercial Catering Appliances*

CCCN1 – *Core Commercial Catering*

COMCAT1 – *Catering appliances Group 1:- Boiler burners, open/solid top ranges, hotplate, bain maries*

COMCAT3 – *Catering appliances Group 3:- Deep fat and pressure fryers, griddles, grills.*

We would like to acknowledge the help of two companies who supplied equipment to Gas Logic to help equip the centre, namely DMP Catering Supplies who supplied the appliances, and Ventam who supplied the ventilation canopy and gas proving system. Over the next few months we hope to have the same facilities installed at our Northolt centre.

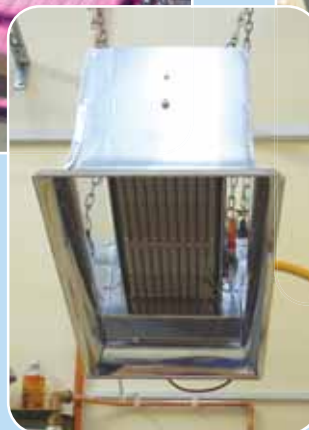

## Re-furbished Commercial Training and Assessment Area at Northolt Centre

Gas Logic's Northolt centre has just undergone a complete refit of its commercial ACS training and assessment areas, with state-of-the-art equipment being supplied by Hamworthy boilers. Mirroring the level of service provided at the new centre in Basildon, Gas Logic can offer the full range of commercial and industrial ACS natural gas and LPG courses to cover core, changeover, pipe work appliances, for training and assessment.

Hamworthy has supplied a Purewell cast-iron atmospheric and Lilliput pressure jet boiler and is now using Gas Logic to train some of its staff. To date, six Hamworthy engineers have completed their ACS assessments with Gas Logic. Steve Hills, commercial director for Hamworthy, said: "I am very pleased with the relationship Hamworthy has formed with Gas Logic - the feedback I have received from the engineers trained so far has been extremely positive. We will definitely be using Gas Logic to meet our training needs in the future."

This gives both Northolt and Basildon the ability to deliver all the main commercial assessments with commercial catering due to come on line at Gas Logic Northolt in the next 2 months.

## Your knowledge base for training and assessment matters

Where do you get information on training and assessment from? [www.gaslogic.com](http://www.gaslogic.com) – your one click site for information on all training matters.

As more and more people use the web to gather the information they need, Gas Logic has redesigned and launched its brand new website. Recognising the importance of search engines in the way people gather and find information, we have incorporated the most up to date search engine friendly coding whilst still making the site as user friendly and, as full of information as possible. This comprehensive website is backed up by our experienced and knowledgeable staff able to answer you calls, give accurate and reliable information, and take your bookings quickly and efficiently.

To see the changes visit [www.gaslogic.com](http://www.gaslogic.com) today and save it to your favourites.

## 17th Edition update for 'Part P' operatives

Since the launch of the CORGI Defined Scope and LOGIC Full Scope 'Part P' courses in 2005, Gas Logic has trained over 750 operatives, most of whom undertook the course based upon BS 7671:2001 16th Edition Wiring Regulations. BS7671:2008 17th Edition Wiring Regulations came in to force on the 1st July 2008 and there is now a requirement from the 'Part P' competent person schemes for those who sat the qualification pre July 2008 to update their qualification to take in the 17th Edition changes.

Gas Logic is able to offer all those operatives who sat the Defined or Full Scope 'Part P' course, a one day 17th Edition update course which will take in all the changes, plus refresh candidates on the testing and inspecting requirements. This course will be certificated by LOGIC Certification and will include a copy of the NEW IEE On Site Guide, which has just been released.

The cost of this course is **£195.00 + VAT** (cost includes certification fee and a copy of the NEW IEE On Site Guide). To book your place call the office on **0845 845 7222**.

## Updated Price List

Enclosed with this newsletter is a copy of Gas Logic's **NEW** Price List which will come into force on all bookings made from the 1st November 2008. Includes updates for Commercial Catering and new courses.

If you have not received a copy of the Price List please contact the office on **0845 845 7222**.

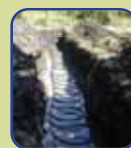

## SUCCESS BREEDS SUCCESS

At Gas Logic we pride ourselves on our success rates with candidates; this is because we believe that candidates should receive the best support possible whilst they are in our centre, and our team of practical industry based trainers and assessors are there to make sure you succeed. Although nothing in life is guaranteed our pass rate on **ACS is 96%**, on **'Part P' it is 94%** and on **17th Edition Wiring Regulations it is 93%**. That is why you can be assured that by making Gas Logic Ltd your choice for training and assessment you are giving yourself the best possible chance for gas and electrical qualifications.

# Forthcoming Courses & Events

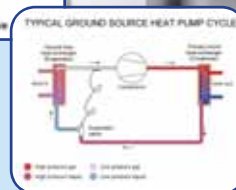

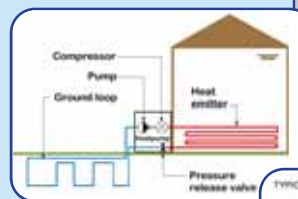

## Heat Pumps – the solution to our heat energy needs?

With fuel prices rocketing, rising CO2 levels and energy supply becoming ever more critical, one technology that is sure to make a positive impact in this country is Heat Pumps. Whether ground source or air source they are set to become a major contributor to reducing the amount of CO2 emitted by the UK when producing heat in the domestic and commercial sector.

Over the next few months we plan to have a Heat Pump course up and running at our centres, covering both ground source and air source. The course will include the following areas:

- Background to market
- Regulations and Guidance
- Principles of Operation
- Collector types
- Heat distribution
- Pre-installation requirements
- Installation Materials & Methods
- Filling, Flushing and Testing
- Setting to work, Commissioning
- Servicing and fault finding

It is anticipated that the course will be 3 days in duration with both a practical and written assessment at the end of the course. The candidates should have a good working knowledge of heating/hot water systems and design, with an NVQ level 3 qualification or equivalent experience. For those without sufficient knowledge of heating and hot water design, Gas Logic has available the LOGIC Certification Heating and Hot Water System Design and Specification course which will give all the underpinning knowledge for calculating accurately, system loads and U values.

To register your interest in this course please call the office on 0845 845 7222 and your name will be added to the list; we will then contact you as soon as the first course dates are set.

## Domestic Energy Assessors and Energy Performance Certificates

With the introduction by the Government for landlords in England and Wales to now have a Domestic Energy Performance Certificate (EPC) for self contained rented domestic properties with new rental agreements as from the 1st October 2008, the demand for qualified Domestic Energy Assessors is growing. Gas Logic will soon be able to offer the City & Guilds 6020-01 Level 3 Diploma for Domestic Energy Assessors, which is one of the required qualifications for those wishing to be able to supply Domestic Energy Performance Certificates. Once a candidate has achieved the qualification they will be able to register with one of the recognised accreditation bodies listed on government website [www.communities.gov.uk/planningandbuilding](http://www.communities.gov.uk/planningandbuilding) and will then be able to offer this service to their customers. It is also a requirement that as part of the sale of any property in England and Wales a Home Information Pack must be produced by the seller which must include an EPC.

The course will involve the candidate attending the centre for training for between 3-5 days, and then building a portfolio by carrying out surveys within designated property and construction types, and producing example certificates. These properties could be friends and families so long as they meet the criteria.

To register your interest for this course please call the office on 0845 845 7222; we will take your details and as soon as the full course information, costs and dates have been finalised we will contact you.

Come and see the **number 1** training organisation on Stand **number 11**.

Gas Logic is pleased to be exhibiting at this year's Chelsea PHEX show on the 19th and 20th November. Due to clashes with fixtures at Chelsea this date is a change to the originally announced dates. With our new centre in Basildon Gas Logic is the premier organisation for training and assessment in the gas, electrical, plumbing and renewable arenas in the South East. Whether you're an existing customer or just want to talk about training and assessment please come and see us on Stand 11.
