ISSUE No: 17

## HAPPY BIRTHDAY LUTON

It seems only yesterday but it has now been over a year since we opened our doors at Luton to our first customers on the 15<sup>th</sup> March 2010. We are delighted with the way the centre has been received and would like to thank all those candidates who have been through Luton over the past 12 months, helping to make this a fantastic 1st year. The AM2 electro-technical Assessment centre has been particularly successful and we have been working with many different colleges in the region to deliver a 1st class service to their learners.

On April the 6<sup>th</sup> and 7<sup>th</sup> the PHEX exhibition is taking place at Wembley and we would like to see as many of our customers as possible, especially Luton customers, at this super event where over 100 exhibitors will be there for you to see and talk too so come and see us on stand 16.

In celebration of Luton's first anniversary and to support the PHEX exhibition at Wembley we are offering any customers who book a course at any Logic4training centres during APRIL a **15% discount\*** if they quote reference **PHEX11**. This is for any bookings placed during April regardless of when the course date is, but remember **you must quote PHEX11** to get this discount and it cannot be used in conjunction with any other offers. \*excludes AM2

Happy 1st Birthday

**Fgas registration date looming...  
...don't forget to book your place on our Fgas course!**

### CENWAT – Coming to a centre near you!

With effect of 1st April, there will be some changes to the Approved Certification Scheme (ACS). The domestic appliance assessments, CEN1 and WAT1 are being combined to create CENWAT, which will be available as both an initial and reassessment. To undertake the CENWAT assessment, the CPA1 assessment must be completed.

This should not present a great deal of change for installers undertaking their ACS. To complete CENWAT as a reassessment, candidates must be renewing both CEN1 and WAT1 at the same time. It will not be possible to undertake CENWAT as a reassessment if the candidate only holds CEN1 or WAT1; for individuals in this position, there is an initial CENWAT module.

For anyone undertaking the Logic4training domestic ACS packages there is actually a price saving as both initial and re-assessment packages now include for CPA1 (see our new price list).

# Fgas deadline is getting nearer

By 4<sup>th</sup> July 2011, it will be a legal requirement for those organisations or companies working with fluorinated gases to hold a full Company Certificate through the bodies appointed by the Department for Environment, Food & Rural Affairs (Defra). A full list can be seen on the Defra website.

To obtain a stationary equipment company certificate (full certificate) businesses must prove that each employed engineer carrying out SRAC work holds a recognised industry qualification in the handling of F Gases which includes the City & Guilds 2079.

Businesses carrying out installations, maintenance or servicing of stationary refrigeration, air conditioning or heat pump equipment (SRAC work) containing or designed to contain F-Gas refrigerants should have already obtained either an interim company certificate or a stationary equipment qualification company certificate (full certificate). Those carrying out SRAC work after 4<sup>th</sup> July 2009 without one or other of these certificates are committing an offence under The Fluorinated Greenhouse Gases Regulations 2009.

To make sure your business complies you need to get those operatives who carry out this work trained as soon as possible. Logic4training offers the City & Guilds 2079-11 Certificate in Fgas and Ozone Depleting Substance Regulations and has either a 3 or 5 day package depending upon the operatives experience and knowledge. More information and prices can be seen on our price list and website.

## NEW PRICE LIST!

On the 1<sup>st</sup> April Logic4training issued its new price list which is included with this newsletter. The new price list includes the changes to the domestic ACS with the introduction of CENWAT. Also included in the new price list are:-

- OFTEC OFT50 – Introductory Oil Fired Technicians Course
- PEB1 – Protective Equipotential Bonding Course for domestic gas meter installers
- HWSS – Hot Water Systems and Safety (includes G3 Unvented HWS).

If you do not have a copy or would like an additional copy for a colleague please contact our Customer Services Team on 0845 845 7222 or a copy can be downloaded from our website at [www.logic4training.co.uk](http://www.logic4training.co.uk) via a link from our website!

## To get the latest update... visit us on Stand 16 at PHEX Wembley Stadium – April 6<sup>th</sup> – 7<sup>th</sup>!

Logic4training believes in meeting our customers face to face where possible, to discuss their individual and/or companies Training & Assessment requirements.

Come and see the **number 1** premier training provider!

With so many changes in the industry happening at the moment you need a training provider that can guide you through these changes and make sure you are best placed to take advantage of them.
