Your guide to becoming a Domestic Gas Heating Installer

A P L

TRAINING & ASSESSMENT CENTRES

APL Your guide to becoming a Domestic Gas Heating Installer

In every home in the UK there is a heating and hot water system with the majority supplied by a gas boiler. In addition to this there are many hundreds of thousands of gas cookers and gas fires. One thing in common for all these different appliances and systems supplied by gas is that the only people able to work on them are those that are registered with the Gas Safe Register and are suitably qualified and competent to do so, this is demonstrated by holding either an ACS Certificate of Competence or a suitable Level 3 NVQ. By choosing to become a domestic gas installer you are choosing a trade and career that will always be in demand. Here at Logic4training we have been training gas engineers since 2002 and have had over 30,000 candidates pass through our doors giving you the confidence that we are name you can trust Logic4training to help you to become a domestic gas heating installer, whatever your experience.

What courses do Logic4training offer?

Logic4training offers 2 routes to becoming a Domestic Gas Heating Installer

Domestic Gas Heating Installer – New Entrants Route

This in centre training programme takes place over a total of 7 weeks and covers all the required areas to becoming a Domestic Gas Heating Installer

Domestic Gas Heating Installer – Experienced Trades Route

This in centre training programme takes place over a total of 3 weeks and covers only the areas relating to gas safety

The candidate will also be required to build an on-site portfolio under the supervision of a registered gas engineer. Logic4training can help with this.

How do I choose which course is right for me?

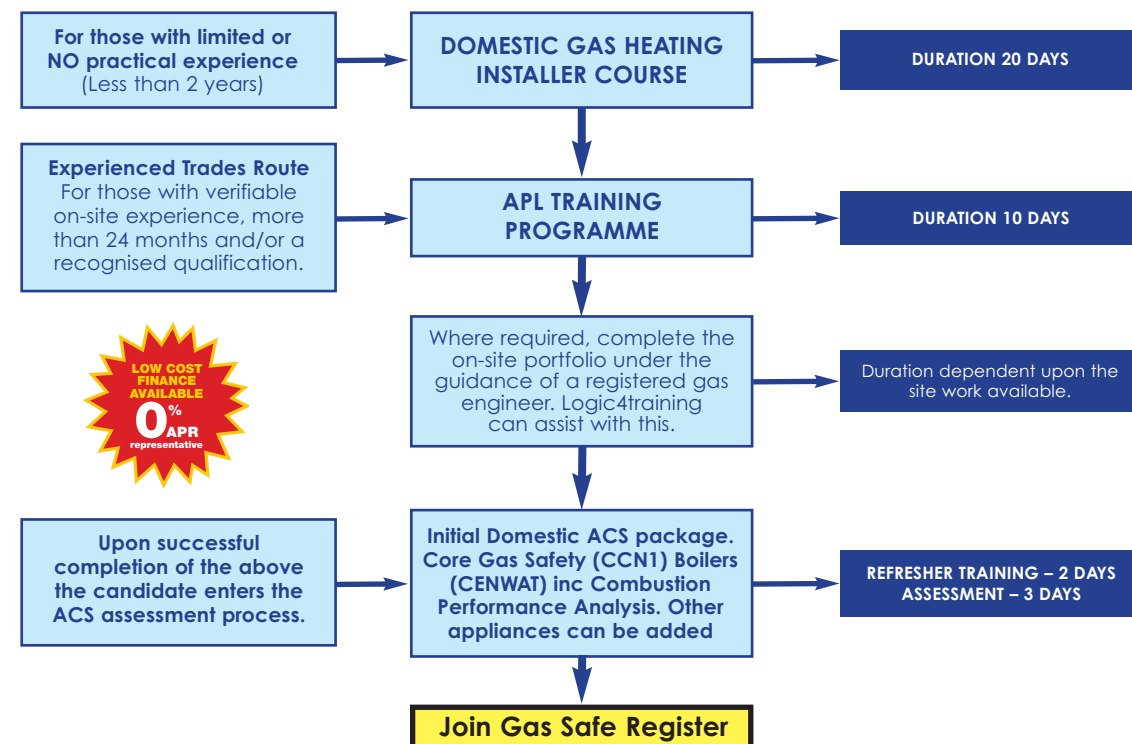

A recommendation that will be made by our experienced staff depending on your experience and skills.

For those with minimal or no experience we would recommend the New Entrants route. We would encourage all those interested to attend our Open Day events where we will give you all the information on the programme and how it will help you achieve your goal.

For those with at least 2 years' experience gained in the workplace in a related trade (plumber, kitchen fitter or similar) and/or a recognised qualification, we would recommend the Experienced Trades Route. This is subject to the candidate attending the APL introduction session during which we will verify your skills, knowledge and experience (proof maybe required).

Your route to becoming Gas Safe Registered

New Entrants Route

SPECIAL OFFER PACKAGE PRICE
£3,750 + vat

Experienced Trades Route

SPECIAL OFFER PACKAGE PRICE
£2,095 + vat

Interest Free Finance Available

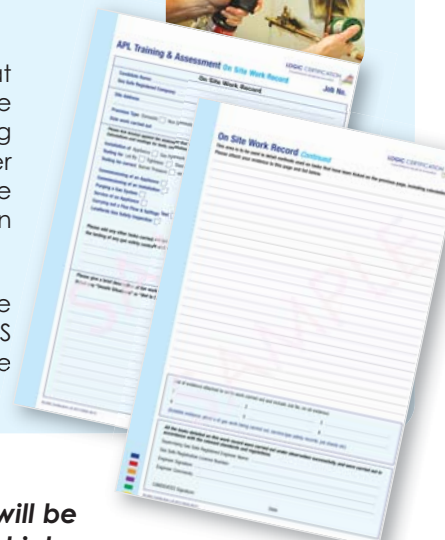

WHAT IS MY NEXT STEP?

Step 1 – Starts with attending our Open Day or APL introduction sessions at one of our centres during which we will explain each of the different parts of the training programme, the qualifications, building a portfolio, taking your ACS and how to become Gas Safe Registered. There is NO charge for this session. You do not have to book at this point and you are free to take the information away and take your time in making the decision that is right for you.

Step 2 – Attend the recommended training programme within the centre. The training includes both theory and practical training in our training rooms and gas workshop. This is carried out during normal opening hours Monday to Friday. You may be given extra revision tasks and online learning to complete during the programme. We will provide a training manual for you to use and keep. At the end of the in centre training programme you will take a knowledge and practical assessment based upon what you have learnt during the programme. On successful completion of this assessment the certification body will issue a training certificate to you

Step 3 – As part of the programme you will need to build a portfolio that demonstrates you can apply the knowledge and skills learnt in the centre on-site under the supervision of a registered engineer. During this stage you may be working with your employer if they are a gas registered engineer or business or assisting another registered engineer on their jobs. If you cannot complete all the on-site tasks we have access properties and registered engineers and we can assist you in the completion of your portfolio (this will be chargeable).

Step 4 – Once the on-site portfolio has been completed and signed off by the registered engineer and one of our assessors, you are ready to book the initial ACS domestic gas package. On successful completion of the ACS assessment you will be ready to apply to join Gas Safe Register as a registered gas engineer.

WHAT NEXT?

To start on the first step call our customer service team on 0345 845 7222 who will be able to advise and book you on to the open day or APL introduction session which are Free of Charge. You can also find more information at www.logic4training.co.uk or email enquiries@logic4training.co.uk
