Celebrating 20 years of training excellence

Your guide to becoming a Plumbing & Heating Installer

At the heart of every home in the UK lies the plumbing, heating and hot water system providing every family with all their needs for hot and cold water, sanitation and warmth throughout their property. These are the fundamental provisions that all of us need to live in this world so by choosing a training path that will equip you with the skills, knowledge and confidence to install these systems you are developing a career for life, wherever that takes you in the world.

We live in a rapidly changing world where the energy delivered to or produced in a property to generate heat and hot water will change over the next 30 years; whether that be Gas, LPG, Oil, Biomass, Heat Pumps,

Solar, Hydrogen, Fuel Cells or even Dilithium Crystals (who knows). But all of them will still need to be connected to a water based plumbing, heating and hot water system. By choosing to start your Diploma or NVQ in Plumbing & Heating with Logic4Training you will have taken the first steps into a rewarding practical career that will allow you to set your path in the industry whether as an employee of a company, a self-employed sole trader or in time starting your own business.

Logic4Training has been delivering training to people like yourselves for over 20 years and has built a reputation for first class delivery and customer service to throughout London, the South East and further.

WHAT COURSES ARE ON OFFER?

We offer the following two courses and routes to becoming a plumbing and heating installer:

LCL Awards Level 2 Diploma in the Installation & Maintenance of Plumbing & Heating Systems

LCL Awards Level 2 NVQ Diploma in the Installation & Maintenance of Plumbing & Heating Systems
(work/onsite assessment based)

WHAT WILL I LEARN?

As soon as you have registered on the course, you will be provided access to our ClubLogic online learning platform where you will start your journey immediately, giving you practical bite size learning sessions that you can return to throughout the course. The L2 Diploma consists of 6 weeks in-centre where you will learn the following as part of the theory and practical sessions:

- » Health & Safety Regulations for safe working in the industry and workplace
- » All relevant regulations and standards including Water Regulations and Byelaws
- » Plumbing Science, Principles and Practices
- » Energy, Waste and Water Conservation
- » Pipework installation skills (copper and plastic) including bending, soldering, jointing, installing and testing
- » Installing and fault finding Cold Water Systems including cold water tanks/cisterns
- » Installing and fault finding Hot Water Systems including hot water cylinder and unvented hot water cylinders
- » Installing and fault finding Central Heating Systems including installation of radiators and pipework
- » Electrical Installation of plumbing and heating system components including safe isolation
- » Installation and maintenance of Above Ground drainage systems
- » All theory and practical examinations as you go through the programme.

[§] Depends on existing qualification & experience. Subject to initial assessment (chargeable)
* Logic4training can offer a portfolio service for the gas programme (chargeable)

The training programme is aimed at complete new entrants so you do not need to have any plumbing skills; that's our job. But you should have a good practical awareness and an ability to carry out practical tasks, so do you like fixing things around the house or your car? You will need to be able to apply basic maths calculations and have a good grasp of written and spoken English to understand the standards and industry documents used throughout the course.

We provide you with a basic set of plumbing tools that are yours to keep. All other tools required will be provided for your use when in the centre. You will need to attend all practical sessions in industry required safe workwear.

Right from the start of your course (once you are booked on) a comprehensive plumbing training manual will be provided to you plus you will have immediate access to the Clublogic online learning platform so you can get your training underway.

WHAT WILL I BE ABLE TO DO AFTER THIS COURSE?

You can progress from the L2 Diploma to the L2 NVQ Diploma which requires you to build a portfolio and undertake an onsite assessment. Once you have achieved your L2 NVQ diploma you can apply for a JIB-PMES CSCS blue card for skilled operatives and also apply for Approved Plumber Status with the local water carrier (additional requirements are necessary).

Alternatively, you can progress from the L2 Diploma to the Managed Learning Programme for Domestic Gas Heating Installers and work towards obtaining your Gas ACS certificates and applying to become a Gas Safe Registered engineer and enter a career in the domestic gas industry.
