# Domestic Gas Heating Installer

## New Entrants

**If you are considering a change of career, one which can provide both job satisfaction and security then becoming a domestic gas installer could be the change you are looking for.**

There are estimated to be about 25 million gas boilers in the UK, all of which will need servicing, repairing or replacing at some point in the future. There are also thousands of adverts for qualified gas engineers posted every month online so it's clear to see that there is demand for correctly trained individuals.

Logic4training has over 20 years of training gas engineers and with our highly experienced teaching staff, there's no better place to start your new career than at one of our centres.

We will guide you through the whole process, from initial training right through to employment. Our small class sizes, all taught from within our state of the art facilities, mean that you get an intensive learning experience and help you to obtain all the necessary skills you will require to start work as soon as your training is complete.

# Domestic Gas Heating Installer Experienced Trades

SEE PAGE 15 FOR DETAILS

0% FINANCING AVAILABLE

**As an experienced trades person you are no doubt aware of the demand for skilled engineers in the domestic gas market nationwide, with around 1.6 million boilers installed in the UK last year alone.**

By upskilling to become a domestic gas installer, you will not only be entering an industry calling out for skilled people, you will also be entering a market which is unaffected by the economic downturn. It also opens up a variety of career pathways, **such as installing Heat Pumps**, to help secure your future and increase your earning potential.

In order to maintain the millions of domestic gas appliances in the UK you must be registered with the Gas Safety Register and be suitably qualified and competent to do so. This is where Logic4training comes into its own.

We are one of the longest established training organisations in the country with over 60,000 students successfully passing through our centres. We don't just provide you with training, our experienced tutors are here to help and guide you through the entire educational process and throughout your future career.

# Domestic Electrical Installer

## New Entrants

**This is an intensive practical training and assessment programme for those wishing to work in the electrical trade and start down the route of becoming registered with a Competent Person Scheme (CPS) as a Domestic Electrical Installer.**

The course has been developed for those with little or no electrical knowledge but who are enthusiastic to learn a new skill. Training will provide the required knowledge and practical skills to be able to install electrical installations within domestic dwellings and,

most importantly, to be able to install, inspect, test and certificate work to the 18th Edition Wiring Regulations.

To become a member of a competent person scheme you will also need to complete and achieve the LCL Awards Level 3 Certificate in Installing, Testing and Ensuring Compliance of Electrical installations in Dwellings. Registering with a CPS allows the installer to self-certify their work and for the CPS to issue a building control compliance certificate directly to the customer (only required for notifiable tasks).

### DOMESTIC ELECTRICAL INSTALLER

This Foundation Course will provide the knowledge and practical skills to be able to install electrical installations within domestic dwellings and, most importantly, to be able to install, inspect, test and certificate work to current regulations and standards. Practical training will cover all the skills to carry out a full domestic electrical installation, including power, lighting, showers, ELV lighting, cookers and outside circuits. The cost includes all required training materials as well as membership of Clublogic – our online learning platform that ensures your always up-to-date.

# Heating and Water Related Courses

ALL PRICING EXCLUDES VAT

DESCRIPTION	DURATION	COST
<b>LCL AWARDS HWSS HOT WATER SYSTEMS AND SAFETY (INCORPORATING UNVENTED HWS)</b> This course is for experienced plumbing and heating operatives who require a qualification in the installation, servicing and maintenance of all domestic hot water systems including the requirements for the installation of Unvented Hot Water Systems as covered by Part G. The course is recognised by those Competent Person Schemes (CPS) approved to offer a self certification scheme under Part G. The price includes a course manual.	1 Day	£230
<b>LCL AWARDS WATER REGULATIONS ADVISORY SCHEME (WRAS) CERTIFICATE</b> This course covers the Water Regulations 1999. The course does not require the candidate to undertake prior learning as all the requirements will be covered during the course. Upon receiving the certificate of competence from LCL Awards, the successful candidates can apply for approval status with one of the Water Industry Approved Plumber Schemes operating in England and Wales, provided he or she has a recognised plumbing qualification and sufficient public liability insurance. This course is certified by LCL Awards and is WRAS approved. The price includes a course manual.	1 Day	£230
<b>LCL AWARDS LEGIONELLA PREVENTION AND WATER TREATMENT (OPERATIVE OR MANAGEMENT COURSE)</b> This course is designed to enable installers or managers to understand the requirements of the ACoP Guidance Document L8, HSE Guidance, British Standards and Water Regulations. The course is for installers carrying out installation and maintenance of hot and cold water supply systems or for managers who are responsible for managing the properties. On completion of the course the installer will be able to undertake risk assessment and carry out disinfection using a range of methods. For the managers they will be familiar with the risk assessment process and outcomes. Installers must hold a valid WRAS Water Regulations certificate. The price includes a course manual.	1 Day	£230
<b>LCL AWARDS L3 RQF AWARD IN ENERGY EFFICIENCY FOR GAS FIRED &amp; OIL FIRED DOMESTIC HEATING &amp; HOT WATER SYSTEMS</b> The LCL Awards L3 RQF Qualification Energy Efficiency for Gas Fired and Oil Fired Domestic Heating and Hot Water Systems is for the professional heating engineer installing heating and hot water systems in domestic properties. This course will prepare you for self-certification and covers Part L1A of the Building Regulations, the Domestic Building Services Compliance Guide, the NEW Boiler Plus requirements and CE54. The certificate will demonstrate your competence and is recognised by Gas Safe Register, Micro- generation Certification Scheme and Competent Persons Scheme.	1 Day	£230
<b>BASIC HEATING SYSTEM &amp; BOILER FAULT FINDING COURSE</b> This course covers the basic required knowledge gas installers need to know to safely test for faults on central heating systems and boilers. Fault finding training will equip candidates with the knowledge to identify a fault based on a boiler start-up sequence, understand and use manufacturers' flow charts and wiring diagrams, plus use multimeters to test circuits, components and earth continuity, focusing on electrical safe isolation and safe working practices. Upon successful completion of the course candidates will be issued a certificate by Logic4training. <b>IDEAL FOR ANY ENGINEERS TAKING THE NEW ENTRANTS OR EXPERIENCED GAS COURSES.</b>	2 Days	£295
<b>LCL AWARDS LEVEL 3 AWARD IN LOW TEMPERATURE HEATING AND HOT WATER SYSTEMS IN DWELLINGS</b> This qualification was designed with the CIPHE and the Heat Pump Association. The objective of this qualification is for candidates to be up-skilled to the requirements for low temperature heating systems, particularly for Heat Pumps, it will allow them to demonstrate their knowledge and understand the need and requirements for designing and installing low temperature heating and hot water systems in dwellings. For those looking to be become registered under the MCS scheme (MIS 3005-D) for the design and Heat Pump systems this qualification is a pre-requisite to be undertaken with the Heat Pump qualification. The price includes a course manual.	2 Days	£345
<b>PIPEWORK IMPROVER COURSE</b> This is a practical pipework skills course to build on an existing engineers knowledge and practical skills in 3 main pipework and jointing areas: - formed pipework using a pipe bender, soldered and compression joint methods. <b>IDEAL FOR ANY ENGINEERS TAKING THE NEW ENTRANTS OR EXPERIENCED GAS COURSES.</b>	2 Days	£310

# Heat Pump Courses & F-Gas Refrigeration Handling

ALL PRICING EXCLUDES VAT

DESCRIPTION	DURATION	COST
<b>AIR SOURCE: LCL AWARDS LEVEL 3 RQF AWARD IN THE INSTALLATION AND MAINTENANCE OF AIR SOURCE HEAT PUMPS SYSTEMS (NON-REFRIGERANT CIRCUITS)</b> This regulated RQF qualification is for those wishing to achieve a nationally recognised qualification in the installation and maintenance of Air Source Heat Pumps Systems (Non-refrigerant Circuits). This qualification is recognised by the MCS registration bodies to join the scheme. Candidates will need to meet minimum qualification and experience requirements.  For those looking to become MCS registered for the INSTALLATION ONLY of Heat Pumps they will need to hold the WRAS Water Regulations qualification.  For those looking to be MCS registered for the INSTALLATION & DESIGN of Heat Pumps they will need to hold the <b>LCL Awards L3 Award in Low Temperature Heating and Hot Water Systems Design in Dwellings</b> in addition to WRAS.	3 Days	£545
<b>GROUND SOURCE: LCL AWARDS LEVEL 3 RQF AWARD IN THE INSTALLATION AND MAINTENANCE OF GROUND SOURCE HEAT PUMPS SYSTEMS (NON-REFRIGERANT CIRCUITS)</b> This is a top up to the Air Source course above and is for those wishing to install and maintain Ground Source Heat Pumps. Candidates should have completed the Air Source Heat Pump course above as this includes the common core unit for Heat Pumps. Entry requirements and pre-requisites remain the same. Candidates completing both will receive separate qualification certificates for both Air Source and Ground Source Heat Pumps.	2 Days	£310
<b>LCL AWARDS LEVEL 3 RQF AWARD IN F-GAS: INSTALL, SERVICE, MAINTAIN, RECOVERY, DECOMMISSION AND LEAKAGE CHECKING OF SYSTEMS (CATEGORY I)</b> <b>FOR EXPERIENCED OPERATIVES :</b> This qualification is for experienced operatives working within the refrigeration and air-conditioning industry who need to meet the legal requirements for working with Fluorinated Gases, otherwise known as F-Gases and other Ozone Depleting Substances. The course also covers brazing of pipework. This package is for those wishing to be covered for all four categories including leak checking, refrigerant recovery, service/maintenance, and installation. The price includes the F-Gas training manual.	5 Days	£920
<b>ADDITIONAL FOR THOSE WITHOUT EXPERIENCE :</b> As above but for those without experience in the refrigeration or AC industry. Candidates will cover all the fundamental principles and core skills prior to undertaking the above course, including principles, components and controls, regulations, pipework, charging and recovery.	+ 3 Days	+£455

“

Very well qualified and experienced lecturers.  
Well explained technical details. Friendly atmosphere.  
I recommend.

# Electrical and Renewables Courses

ALL PRICING EXCLUDES VAT

DESCRIPTION	DURATION	COST
<b>LCL AWARDS LEVEL 3 RQF AWARD IN THE INITIAL VERIFICATION AND CERTIFICATION OF ELECTRICAL INSTALLATIONS</b> This qualification is for experienced electricians who are responsible for the initial verification, testing and certification of electrical installations to BS7671: and in particular the requirements within Guidance Note 3. The course will cover the testing required to complete Electrical Installation and Minor Works certificates including Polarity, Insulation Resistance, Earth Loop Impedance and RCD testing in both practical and theory training session. It is recommended that candidates hold the 17th or 18th Edition Wiring Regulations qualification. Assessment is by practical task, multiple choice and a written exam which is open book.	4 Days	£595
<b>LCL AWARDS LEVEL 3 RQF AWARD IN THE PERIODIC INSPECTION, TESTING, CONDITION REPORTING AND CERTIFICATION OF ELECTRICAL INSTALLATIONS</b> This qualification is for experienced electricians who are responsible for PERIODIC INSPECTION, testing and certification of electrical installations to BS7671: and in particular Guidance Note 3. The course will cover the requirements and methods for carrying out periodic inspections and completing electrical installation condition reports in both practical and theory training sessions.  It is ESSENTIAL that candidates are fully conversant with testing and inspection as detailed in the Initial Verification qualification, as this will not be covered. If the candidate has not gained the necessary experience then it would be advisable to attend the Initial Verification course first. It is recommended that candidates hold the 17th or 18th Edition Wiring Regulations qualification. Assessment is by practical task, multiple choice and a written exam which is open book.	3 Days	£465
<b>LCL AWARDS LEVEL 3 RQF AWARD IN DOMESTIC, COMMERCIAL AND INDUSTRIAL ELECTRIC VEHICLE CHARGING EQUIPMENT INSTALLATION</b> This course is for experienced electrical installation operatives and covers all the key skills to install, fault find and inspect and test domestic and commercial electric vehicle charging points. Candidates must hold an Inspection and Testing qualification and 18th Edition Wiring regulations qualification. The course is based upon the IET Code of Practice for the installation of EV charge point installations and a copy of this book is included in the course.	2 Days	£415
<b>LCL AWARDS DOMESTIC ELECTRICAL INSTALLER COURSE (FULL SCOPE) – PART P</b> The course is for any experienced operative involved in the installation of domestic electrical systems whether part or full installation. The course and assessment is based upon the 2013 Part P document and BS 7671 Wiring Regulations. This practical based course covers installation, inspection, testing and certification on domestic electrical installation as part of the following subject areas: <ul style="list-style-type: none"> <li>• Legislation and Standards</li> <li>• Design Specification and Cable Installation</li> <li>• Mains Position</li> <li>• Safety Devices</li> <li>• Power and Lighting Circuits</li> <li>• Definitions and Basic Principles</li> <li>• Special locations</li> <li>• Earthing and Bonding</li> <li>• Safe Isolation and Working Practice</li> <li>• Inspection, Testing and Certification</li> </ul> Assessment is by practical task, multiple choice and an online exam. The price includes supply of the Electricians Guide to the Building Regulations and Certification fee, IET On-Site Guide.	5 Days	£895
<b>LCL AWARDS LEVEL 3 RQF SOLAR PHOTOVOLTAIC (PV) INSTALLATION TRAINING COURSE</b> This Solar Photovoltaics installation course is aimed at experienced domestic and commercial electrical operatives who wish to install solar photovoltaics packages. The cost of the course includes training, assessment, the certification fee and course material.	3 Days	£595
<b>LCL AWARDS LEVEL 3 RQF ELECTRICAL ENERGY BATTERY STORAGE TRAINING COURSE</b> This Electrical Energy Battery Storage installation course is aimed at experienced domestic and commercial electrical operatives who wish to install electrical battery storage systems and packages and is based upon the IET code of Practice which is included within the cost of the course. The cost of the course includes training, assessment, the certification fee and course material.	2 Days	£495

# Smart Metering Training and Assessment Courses

ALL PRICING EXCLUDES VAT

DESCRIPTION	DURATION	COST
<b>NEW ENTRANT SMART METER INSTALLER - DUAL FUEL (GAS &amp; POWER)</b> This is a managed learning programme for new entrants to the industry. The programme will include introduction to the industry, H&S, customer protocols to ensure CoMCoP compliance and all aspects of gas & power smart meter installations & exchanges. Mentoring period is required with an employer. The final week includes initial CoMCoP assessments, ACS assessments and assessments for EUSR registration. Price includes EUSR registration.	11 Weeks	From £6,500
<b>NEW ENTRANT SMART METER INSTALLER - GAS</b> This is a managed learning programme for new entrants to the industry and/or existing power smart metering installers who are upskilling to dual fuel smart meter installers. The programme will include customer protocols to ensure CoMCoP compliance and all aspects of gas smart meter installations & exchanges to include legislation, combustion, ventilation, installation of pipework & fittings, tightness testing & purging, unsafe situations & flues. Mentoring period is required with an employer. The final week includes ACS assessments and assessments for EUSR registration. Price includes EUSR registration.	7 weeks	From £4,500
<b>NEW ENTRANT SMART METER INSTALLER - POWER</b> This is a managed learning programme for new entrants to the industry and/or existing gas smart metering installers who are upskilling to dual fuel smart meter installers. The programme will include H&S, customer protocols to ensure CoMCoP compliance and all aspects of power smart meter installations & exchanges (Single Phase, Multi rate & Single Phase off Multi Phase) to include identifying different metering configurations, testing and fault finding. Mentoring period is required with an employer. The final week includes initial CoMCoP assessments and NSAP approved assessments for EUSR registration. Price includes EUSR registration.	18 Days	£3,000
<b>MULTI PHASE METER INSTALLATION AND EXCHANGE COURSE</b> 5-day training programme for experienced domestic smart meter installers with at least 12 months experience on Single Phase, Multi rate and Single Phase off Multi Phase supplies. Should be CoMCoP/SMIS/SMICOP trained. Logic4Training's Multi Phase Meter & Exchange Installation course provides the practical skills including testing & Multi Phase faults, and underpinning knowledge required to install / exchange Multi Phase meters in domestic, commercial and industrial applications. Price includes EUSR registration.	5 days	£1,095
<b>EUSR / REC / COMCOP (FORMALLY MOCOPA) RENEWAL</b> For operatives currently working for an authorised business who need to renew their individual authorisation(s). This is a 1 day (2 days for dual fuel) assessment package that includes theory assessments and observed practical assessments covering Single Phase, Multi rate and Single off Multi Phase meter installations. Multi Phase & Gas Low Pressure can also be included, if required. Price includes EUSR renewal registration.	1 or 2 days	From £295
<b>PERMIT TO OPERATE (PTO) ASSESSMENTS FOR EXISTING QUALIFIED ENGINEER</b> Operatives must be put forward by their employer / potential employer. It is assumed candidates are experienced and skilled metering operatives. Candidates will sit a range of test papers in line with their assumed competencies. Enhanced One-on-one practical assessments including fault finding & customer protocols as outlined in CoMCoP (formally SMIS/SMICOP). Practical assessments carried out in line with NSAP / employers Safe Systems of Work (SSoW). Candidates can be put forward for the following PTO assessment competencies: Single Phase, Multi rate, Single off Multi Phase, Multi Phase and/or Gas Low Pressure. Price includes EUSR registration and detailed feedback regarding their candidates competencies.	1 or 2 days	From £326

Logic4training welcomes all students from all backgrounds, regardless of age, gender or previous experience. We pride ourselves on providing an equal opportunity to all.

# Smart Metering Training and Assessment Courses

ALL PRICING EXCLUDES VAT

<b>COMCOP INITIAL TRAINING AND ASSESSMENT PACKAGE / EUSR REGISTRATION</b> Logic4Training's CoMCoP Initial Training and Assessment Package is designed for operatives who are currently working for an authorised business but have never held EUSR registration themselves. It is assumed candidates are experienced meter operatives. The training package covers all aspects of power smart metering installations (Single Phase, Multi Rate, Single Phase off Multi Phase & Multi Phase, if required). The training package also covers the required Health & Safety aspects and the required underpinning knowledge regarding customer protocols to ensure they are CoMCoP compliant (formally SMICOP/SMIS). Assessments will include observed practical assessments and theory assessments. Price includes EUSR registration.	3 days	£745
<b>HEAVY DUTY CUT OUT (HDCO) AWARENESS</b> Logic4Training's Heavy Duty Cut Out Awareness training package gives candidates the underpinning knowledge to work on cut outs with J-Fuses and/or cut outs that exceed 100amps per phase. Candidates must be Multi Phase & CoMCoP (formally MOCOPA/SMICOP/SMIS) trained. The training will include identification of HDCO's, the risks associated with HDCO's, identification of any faults associated with HDCO's & the testing processes required. Assessments will include observed practical assessments and theory assessments. Price includes in house certification.	2 days	£460
<b>SAFE ISOLATION OF A CUT OUT AWARENESS</b> Logic4Training's Safe Isolation of a Cut Out Awareness training package gives candidates the underpinning knowledge to safely de-energise & re-energise the supply to a property to facilitate the installation of isolators or to allow the installation of other equipment in both domestic and non-domestic premises - such as Electric Vehicle Charging Points. The training will include demarcation boundaries, regulatory bodies, tools & PPE requirements, cut out identification, cut out safety & inspection, service termination issues & reporting, cut out testing & cut out faults. Assessments will include observed practical assessments and theory assessments. Price includes in house certification.	1 day	£230

Courses can be run as single company only if there are sufficient numbers. Other programmes are available including Full managed learning programmes for gas and power combined.

## Property Maintenance Courses

DESCRIPTION	DURATION	COST
<b>ESSENTIAL SITE SKILLS FOR BUILDING SERVICES INSTALLERS</b> The course is designed to give existing building services engineers a more rounded understanding of the works required to finish a job to a high standard, leading to greater customer satisfaction and less need to call in supporting trades people.	5 Days	£995
<b>PROPERTY MAINTENANCE FOR LETTINGS, CARETAKING AND FACILITIES MANAGEMENT</b> Logic4Training's Property Maintenance course for lettings, caretaking and facilities management, is designed to train individuals and teams in the core practical skills required to upkeep both domestic and commercial sites such as tenanted properties, schools, hospitals and offices. Areas covered include basic plumbing and electrics, general repairs, decorating, site safety, damp prevention and energy efficiency.	2 Weeks	£1,495

# Safety Management Courses

ALL PRICING EXCLUDES VAT

DESCRIPTION	DURATION	COST
<b>LCL AWARDS LEVEL 2 RQF AWARD IN GAS SAFETY AWARENESS IN SOCIAL OR RESIDENTIAL HOUSING</b> This regulated RQF qualification is for those learners working within either the Social Housing sector or Residential Letting or Management sector and who need to be aware of gas safety matters affecting their tenants and residents in domestic dwellings. These could be housing maintenance staff, RLOs, call centre staff and letting agents working for local authority's, housing associations or private Letting or Management agents. The course will cover gas safety, carbon monoxide, landlord's duties and responsibilities, regulations and other areas relating to the subject. Assessment is by a short written exam.	1 Day	£230
<b>LCL AWARDS CAVITY WALL &amp; LOFT INSULATION INSTALLER – GAS SAFETY AWARENESS COURSE</b> This course is to assist employers, employees and sub contractors involved with the work of installing cavity wall and loft insulation or external wall cladding who need to comply with the requirements of the Health & Safety at Work act and Gas Safety (Installation and Use) Regulations. The course will provide operatives with the skills and knowledge required to identify and minimise the risks associated with the installation of cavity wall and loft insulation in domestic premises where gas, oil and/or solid fuel appliances are fitted. The course is certified by LCL Awards under the ACoP.	1 Day	£230
<b>LCL AWARDS LEVEL 2 AWARD IN ELECTRICAL SAFETY AWARENESS IN SOCIAL HOUSING AND RESIDENTIAL DWELLINGS</b> This regulated RQF qualification is for those learners working within either the Social Housing sector, Residential Letting or Management sector who need to be aware of electrical safety matters affecting their tenants and residents in dwellings. These could be housing maintenance staff, RLOs, call centre staff and letting agents. The course will cover electrical safety regulations and guidance, principles and characteristics of electricity, uses and risks within dwelling, safe isolation, maintenance and records of electrical installations, landlord's duties and responsibilities, PAT testing and other areas relating to the subject. Assessment is by a short written exam.	1 Day	£230
<b>LCL AWARDS PROTECTIVE EQUIPOTENTIAL BONDING (PEB1)</b> This course is for those qualified gas operatives involved in the repositioning, altering or extending of the Protective Equipotential Binding Conductor when exchanging or altering the position of gas meters within dwellings. Candidates must possess as a minimum a valid CCN1, CMA1, CESP1 or CCLP1 (PD) or equivalent and MET1. A knowledge of basic electrical principles would be an advantage but not essential.	0.5 Day	£175
<b>LCL AWARDS LEVEL 3 RQF AWARD IN AUDITING OF GAS WORK</b> This course is for candidates responsible for undertaking auditing of gas work within or for a business. It covers how to plan, carry out, record and follow up on a gas audit in a safe and consistent manner. Candidates must hold a current and valid certificate of gas safety competence for the range and type of gas appliances and installations to be audited.	3 Days + home study	£695

Logic4training welcomes all students from all backgrounds, regardless of age, gender or previous experience. We pride ourselves on providing an equal opportunity to all.
